

CLINIC IN THE PARK

Eric Acampora, Eddie Duong, Ka Lun Lee,
Hugo Polanco

What are we building? For whom?

Why?

- A database (accessible through website portal) that tracks visitor data at Clinic in the Park events:
 - Attendance at stations
 - Health services received
 - Provides additional information based on visits
- Clinic in the Park and its Visitors
- Helping Underserved Community in Orange County
 - Optimize current methods and procedures
 - Make system more efficient and useful for all parties involved
 - Provide security to visitors in the process

What Have We Done?

- Met with Stakeholders
 - Gathered initial requirements
- Attended CITP Event
 - Examined current system
 - Looked for ways to improve
- Attended Meeting with Six
 - (talk about it at later slide)

What Difficulties Have We Encountered?

- Gathering Requirements
- Transportation
- Finding a way to track visitors without using personal information (still working on this...)

2-Week Plan

- From Meeting with Six:
 - Help re-design existing “passport”
 - Get server access
 - PHP/MySQL vs Rails
 - Lots of documentation and learning tools needed to proceed with project
